Professional Summary

- Full Stack Engineer with **4.3+** years building healthcare and enterprise products with React.js, Next.js and Node.js, including RAG-based AI features; cut bundle size by **40%**, page load time by **35%**, and led a team of 3 developers.

Tools & Technologies

Frontend:	React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Expo
State & UI:	Redux, Zustand, React Query, Context API, Radix UI, Framer Motion, GSAP
Backend & Database:	Node.js, Express.js, REST APIs, WebSockets, MongoDB, SQL
AI & LLM:	RAG, LangChain, Pinecone (Vector DB), LLM Integration, Claude, ChatGPT, GitHub Copilot, Codex
Cloud & DevOps:	AWS EC2, AWS S3, Docker, Nginx, CI/CD (GitHub Actions), Grafana
Testing & Tools:	Jest, Vitest, Git, GitHub, Jira, Agile, Scrum

Experience

Career Break & Independent Projects Jan 2026 – Present

- Built and shipped two live Next.js websites, one used by 400+ wedding guests (see Projects).

Leader IT Pvt Ltd, Trivandrum – *Full Stack JavaScript Developer* May 2025 – Dec 2025

- Modernized the UI of **Automax 3.0**, a low-code enterprise platform, by building configurable and customizable components that improved usability and workflow flexibility, with build optimizations that reduced bundle size by 40%.
- Built an in-app AI chatbot for Automax 3.0 with RAG and LangChain, giving users instant answers inside the platform.
- Implemented browser-based real-time voice and video calling using SIP and WebSocket integration, enabling communication directly within the product and eliminating the need for third-party tools.
- Designed data visualization dashboards with new chart formats that accelerated insight delivery for BI developers.
- Delivered hybrid Android and iOS apps with Expo by embedding web views, ensuring consistent cross-platform behavior.

Jireh Software Solutions, Bengaluru – *Software Developer → Team Lead* Feb 2023 – Mar 2025

- Built **stethUP** (live), a healthcare learning platform for B2C and B2B users with course, sales and event management features and dedicated dashboards; optimized Core Web Vitals and SEO, reducing page load time by 35%.
- Built an AI healthcare chat interface with RAG and LangChain, improving user engagement and support efficiency.
- Deployed and maintained React applications on AWS EC2 with load balancing for high availability in production.
- Led and mentored 3 junior developers, improving collaboration, code quality, and timely delivery of project milestones.

KonnectzIT, Bengaluru – *Software Engineer* Nov 2021 – Apr 2022

- Built Aloy, a Google Cloud Text-to-Speech automation platform with adjustable pitch, volume, delay and speech rate.

SWENG Solutions, Bengaluru – *Software Intern* Sep 2020 – Jul 2021

- Created Help Me Online (HMO), a Progressive Web App enabling COVID-19 medical aid and disaster relief donations.

Projects

Yoga Studio Website | *Next.js, Tailwind CSS, Radix UI, Framer Motion* Live site

- Built a server-rendered studio site for a client pitch, with batch schedules, pricing, gallery, FAQ and WhatsApp booking.
- Optimized performance and SEO with WebP images, lazy loading, a prioritized hero image, preloaded self-hosted fonts for zero layout shift, Open Graph metadata and reduced-motion support.

Wedding Invitation Website | *Next.js, GSAP ScrollTrigger, Lenis* Live site

- Built a live, mobile-first invitation in a South Indian traditional design for 400+ guests, with scroll-driven storytelling (pinned, scrubbed scenes, layered parallax), RSVP, countdown, scratch card, mini games and music.
- Optimized mobile performance with responsive WebP images, preloaded fonts, deferred loading and zero layout shift.

Education

B.E in Computer Science - *RNS Institute of Technology* - Bengaluru Aug 2015 – Aug 2020
